SPECIAL COMMITTEE ON AGING

April 15, 2026

The Honorable Lisa Murkowski
Chair
Interior, Environment, and
Related Agencies

The Honorable Jeff Merkley
Ranking Member
Interior, Environment, and
Related Agencies

Dear Chair Murkowski and Ranking Member Merkley,

I certify that neither I nor my immediate family has a pecuniary interest in any of the congressionally directed spending items that I have requested in the Fiscal Year 2027 Interior, Environment, and Related Agencies Appropriations bill, consistent with the requirements of paragraph 9 of Rule XLIV of the Standing Rules of the Senate. None of the entities for which I have requested congressionally directed spending are for-profit entities.

Sincerely,

A handwritten signature in black ink, appearing to read "Andy Kim", with a long horizontal flourish extending to the right.

Andy Kim
United States Senator

Kim, Andy(D-NJ) Interior and Environment Congressionally Directed Spending Requests

Recipient Name	Project Purpose	Project Location	Amount Requested (\$000)
City of Asbury Park	This project supports two resiliency improvements at the City of Asbury Park wastewater treatment plant: elevating an existing transformer to protect it from revised flood elevations and replacing three severely damaged influent pumps to maintain reliable wastewater conveyance during storm events.	Asbury Park NJ	\$440
Atlantic City Municipal Utilities Authority	This project supports the replacement or rehabilitation of the remaining three transmission crossings for the Atlantic County Municipal Authority. This investment will modernize critical infrastructure within the drinking water distribution system.	Atlantic City NJ	\$1,000
Borough of Avalon	This project supports the identification of lead service lines in the Borough of Avalon. This investment will allow for the township to develop an engineering plan to remove the service lines, and carry out the work in accordance with State guidelines.	Avalon NJ	\$4,000
Township of Barnegat	This project supports the construction of standpipe water main extension along Barnegat Boulevard in the Township of Barnegat. This investment will strengthen the Township's ability to maintain safe, reliable drinking water service for existing residents and businesses.	Barnegat NJ	\$400
City of Camden	This project supports the rehabilitation of severely deteriorated sanitary sewer mains using trenchless lining methods in the City of Camden. This investment will greatly improve public health and system reliability.	Camden NJ	\$2,250
Mid-Atlantic Center for the Arts (trading as Cape May MAC)	This project supports the restoration and preservation of the Cape May Lighthouse for the Mid-Atlantic Center for the Arts. These improvements will ensure its continued maritime function and preserve it as a key historic and cultural destination in Cape May.	Cape May NJ	\$500
Township of East Windsor	This project supports the modernization of the stormwater management system for the Township of East Windsor. These investments in system maintenance will improve stormwater quality, protecting environmental conditions and residents' health.	East Windsor NJ	\$550
Borough of Elmwood Park	This project supports the Domestic Water Main Replacement Project in the Borough of Elmwood Park. This investment will reduce service disruptions, lower maintenance costs, protect public health, and assist the Borough meet state requirements.	Elmwood NJ	\$1,920
The City of Orange Township	This project supports the construction of a permanent PFAS treatment system at the Chestnut Street Pump Station in the City of Orange Township. This investment will remove harmful contaminants from the drinking water supply and ensure compliance with state and federal standards.	Essex NJ	\$5,000
Township of Freehold	This funding supports the replacement of aging water mains and rehabilitates the sanitary sewers along Townsend Drive and Adams Place in the Medford Boulevard area of the Township of Freehold. This investment will be more durable infrastructure to improve water service reliability and quality.	Freehold NJ	\$1,358
Jersey City Municipal Utilities Authority	This project supports the replacement of aging lead service lines in Jersey City. These improvements will allow for greater movement through the system to provide clean drinking water and promote more equitable water quality for all residents.	Jersey City NJ	\$1,000
Township of Little Falls	This project will address severe erosion, improve water quality, and protect critical infrastructure. This investment builds will enhance watershed resilience, reduce pollutant loading, and mitigate environmental and public health risks.	Little Falls NJ	\$4,000

Borough of Longport	This project supports the replacement of Well No. 3 located on 31st Avenue at Winchester Avenue in the Borough of Longport. This investment will resolve several deficiencies that could lead to well failure.	Longport NJ	\$1,600
Township of Mahwah	This project supports the installation of an advanced PFAS treatment systems at multiple municipal wells to ensure compliance with federal and state drinking water standards. This project will protect public health, strengthen critical water infrastructure, and ensure a safe, reliable drinking water	Mahwah NJ	\$10,000
Maple Shade Township	This project supports the Main Street Force Main in Maple Shade. This investment will prevent Sewer System Overflows (SSOs) and protect public health.	Maple Shade NJ	\$1,600
Middletown Township	This project supports the renovation of the stormwater pumping station for Middletown Township. This investment will increase water flow and prevent flooding in the area.	Middletown NJ	\$5,224
Township of Millburn	This project supports a wildfire mitigation study in the Township of Millburn. This project will increase the safety of residents, first responders, and surrounding communities.	Millburn NJ	\$200
Montgomery Township	This project supports the consolidation of the aging Cherry Valley Wastewater Treatment Plant into the modern Skillman Village facility in Montgomery Township. This project will eliminate outdated infrastructure, improve water quality in the Millstone River watershed & ensure regulatory compliance.	Montgomery NJ	\$3,000
Township of Montville, New Jersey	This project supports the planning, design and construction of a new PFAS & manganese treatment plant in Montville Township. This investment will improve drinking water quality, protect public health, and achieve compliance with federal and state's regulatory requirements.	Montville NJ	\$19,000
Township of Parsippany-Troy Hills	This project supports the installation of water mains and hydrants in the Borough of Franklin Lakes. This investment will improve the water quality for residents who rely on local wells and ponds for water.	Morris NJ	\$5,000
Neptune Township	This project supports improvements to stormwater management and water quality in Fletcher Lake and Wesley Lake through dredging, bank stabilization, and installation of stormwater controls.	Neptune NJ	\$10,248
Borough of New Milford	This project supports the installation of a new Reinforced Concrete Pipe (RCP) storm drainpipe in the Borough of New Milford. The investment will have a direct benefit to residents and the community at large by reducing the impact of stormwater damage.	New Milford NJ	\$207
Town of Newton	This project supports the replacement of failing biosolids treatment equipment at the Wastewater Treatment Plant. This investment will enhance operational reliability, reduce costs, and improve environmental performance by minimizing odors and untreated sludge hauling.	Newton NJ	\$1,520
Town of Newton	This project constructs a new pump station to replace an aging, failing facility that currently conveys wastewater from approximately half of Newton's collection system. This investment will deliver a modern facility with upgraded equipment & controls which will improve system reliability.	Newton NJ	\$1,398
Borough of Oakland	This project supports the construction of a PFAS/PFOA treatment system to comply with the Environmental Protection Agency's drinking water standards. This will ensure the provision of healthy and safe drinking water for Oakland's residents, businesses, and restaurant patrons.	Oakland NJ	\$3,648
Lakewood Township Municipal Utilities Authority	This project supports the installation of granular activated carbon adsorption systems (GACAS) for Wells #1, #2, #3 in Township of Lakewood. This investment will allow for the removal of per- and polyfluoroalkyl substances to comply with State and Federal guidelines.	Ocean NJ	\$2,524

Borough of Paramus	This project supports the construction of a sanitary sewer pumping station & upgrades to wastewater infrastructure serving the Borough of Paramus's New Valley Hospital campus. This project will strengthen wastewater reliability, protect local waterways, and support critical healthcare infrastructure	Paramus NJ	\$6,000
Borough of Park Ridge	This project supports the identification and removal of lead service lines in the Borough of Park Ridge. The project will reduce lead exposure risks, protect public health, and improve drinking water reliability for more than 16,000 residents served through over 5,000 connections.	Park Ridge NJ	\$4,000
Borough of Park Ridge	This project supports the dredging of Park Ridge Mill Pond in the Borough of Park Ridge. This investment will reduce stagnant water & mosquito breeding conditions. It will also help protect downstream drinking water resources, including Pascack Brook and the Woodcliff Lake Reservoir.	Park Ridge NJ	\$5,000
Pemberton Township	This project supports rehabilitation of primary clarifiers at a wastewater treatment plant in Pemberton Township. This investment will protect local waterways and groundwater resources while ensuring compliance with Clean Water Act standards.	Pemberton NJ	\$1,500
Borough of Pennington	This project supports a PFAS Water Treatment plant for the Borough of Pennington. This investment will improve the water quality and long-term health benefits for residents.	Pennington NJ	\$5,500
Township of Pequannock	This project supports the building of a new sanitary sewer pumping station in Brooklawn. This investment will replace an aging, undersized and obsolete sewer pump station.	Pequannock NJ	\$1,750
Borough of Ramsey	This project supports the construction of PFAS treatment facilities at active municipal drinking water wells in the Borough of Ramsey. This investment ensures continued access to safe, reliable drinking water for more than 30,000 residents while preserving critical local water infrastructure.	Ramsey NJ	\$1,000
Borough of Rocky Hill	This project supports the replacement of aged water mains in the Borough of Rocky Hill. This investment will ensure our municipal water system has an adequate supply of water, including backup water in case of an emergency or break somewhere in the water system.	Rocky Hill NJ	\$3,320
City of Sea Isle City	This project supports critical flood mitigation infrastructure throughout Sea Isle City. The funding will support the construction of a stormwater pump station to alleviate tidal and storm flooding in the area of Sea Isle City bounded by 30th and 38th Street, the bay, and Pleasure Avenue along the b	Sea Isle NJ	\$4,000
Borough of Spotswood NJ	This project supports the replacement of lead service lines in the Borough of Spotswood to provide safe drinking water to residents to reduce the impacts of lead contaminates on children and older adults.	Spotswood NJ	\$2,000
Township of Teaneck	This project supports the improvement of the drainage capacity of stormwater on Queen Anne Road for the Township of Teaneck. These improvements will reduce the risk of flooding and exposure of polluted stormwater runoff into residential areas.	Teaneck NJ	\$1,051
Borough of Wallington	This funding supports the replacement of lead water service lines which are present throughout the Borough of Wallington. This investment will improve the safety and quality of our public drinking water supply.	Wallington NJ	\$12,000
Borough Of Wanaque	This project will rehabilitate and upgrade the Union Court Sanitary Sewer Pump Station, a critical wastewater infrastructure asset serving residents. This project will improve system reliability, prevent sanitary sewer overflows, and protect water quality in the Borough of Wanaque.	Wanaque NJ	\$988

Borough of Watchung	This project supports the full depth dredging of Watchung Lake and Best Lake, to the depth that existed prior to the accumulation of sediment within the lakes. This investment will enable the lakes to serve as natural catch basins for stormwater and regulate flooding in low-lying municipalities.	Watchung Lake NJ	\$5,711
